## COMPANY PROFILE

Nuosen heavy Machinery Co., Ltd, after focusing on hydraulic hammers for over 14 years, has become a leading company in the industry because of the variety and quality of its products, and its market share.

In 2004, Hangzhou Nuosen Machinery Co., Ltd was established, first appeared on the historical stage. The company moved to Jiangsu Binhai industrial park as Nuosen Heavy Machinery Co., Ltd in 2010. There it received greater attention from local government,

which placed emphasis on its development. In 2012, the international sales center integrated with elegant Qiantang river views and near the Xiaoshan International Airport and Hangzhou Railway station. In 2013, the company took over a famous factory, and began exporting products to the overseas market; Nuosen employs a group of high educated engineering technicians with abundant design experience. The company uses precise technology and constantly imports

advanced equipment, and has implemented advanced production technology and processes. These have greatly improved production efficiency and serve to guarantee the high quality, high efficiency and durability of the products.

In 2017, a new production center and office building were completed. The production center covers 55000 square meters. Nuosen Machinery received an overall upgrade. The yearly producing reaches 15,000 units, the largest diameter of working tool is 210mm.

Nuosen has continued to win the approval of the ISO900 and CE quality management systems,

and is involved in the construction of key national and local projects. The products have been widely recognized by the industry and substantial cooperation has also been conducted with many excavator manufacturers in the OEM market. Besides, we are the exclusive dealer of Chicago Pneumatic(CP) in China in 2014.

Our products include "Hydraulic Pressure+Nitrogen Gas" breakers and spare parts for all the models.

Nuosen strives to enhance the management proficiency of the enterprise, owns 12 branches, more than 200 agents, 8 central warehouses, and its sales net services cover the globe. In America, Europe, Asia, the Middle East... Nuosen can be found everywhere in the world.

## STRUCTURE AND FEATURES

### Structure and Features

■ The key indexes of a hydraulic breaker is the hit frequency and hit energy. Each model of Rewin series is equipped with powerful hit system hydraulic & nitrogen, with high efficiency, low power loss, and maximum twice-hit energy, which provide great hit energy.

### Hit Energy Improved Structure

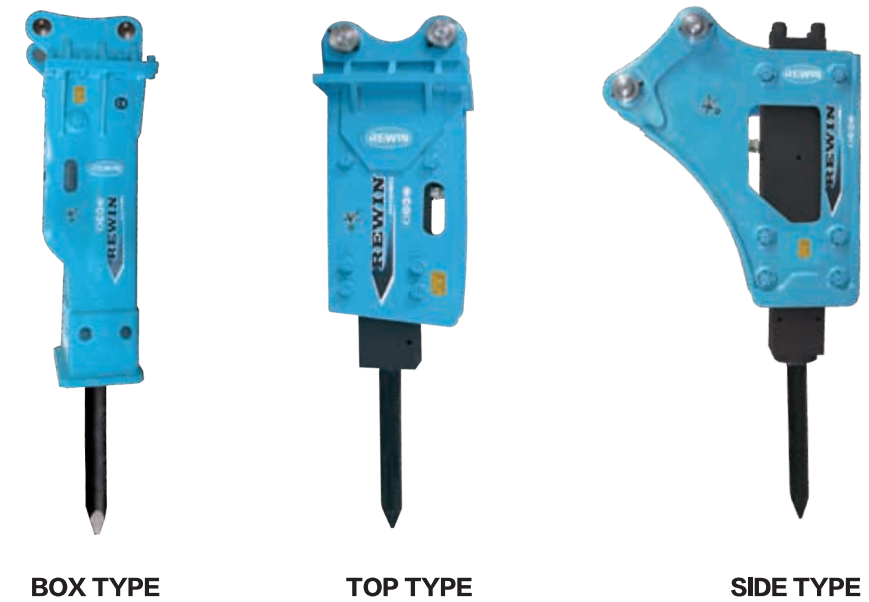

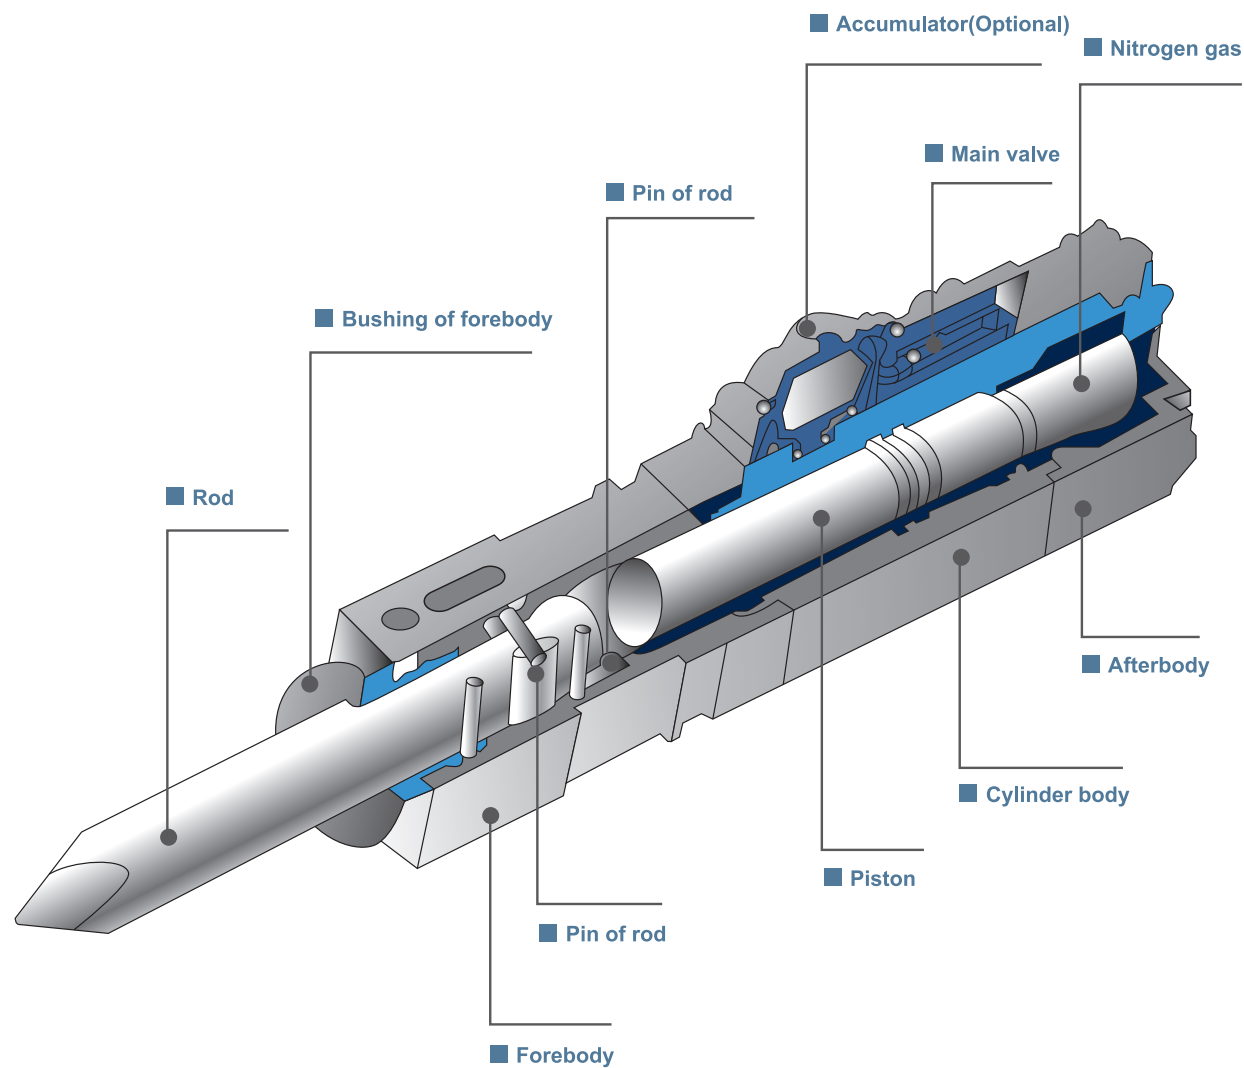

■ The outstanding design longer the running distance of piston and main body, making the breaker a maximum matching rate with the mainframe.

### Flow Adjustable Device

■ The device gives effective adjustment of the flow from the grab or power source, which enable the adjustments according to the hardness of rocks, high hit energy with low hit frequency, low hit energy with high hit frequency.

### High-Quality Materials & Specially Precise Process

■ Special precise process ensures the sealing, great hit energy and outbreak force, with high-quality materials ensuring durability.

Item	Unit	SMALL MODEL					
		RWB40	RWB45	RWB53	RWB68	RWB75

## COMPANY PROFILE

- PRODUCTS High efficiency and outstanding quality
- COOPERATION Pleasant experiences
- SERVICES Rapid, accurate, friendly, non-excuse
- BRAND Globalized with faithful distributors and users in places
- STAFF Focus and never pause on the way to target

- ORGANIZATION Stimulating, brave, calm, unified, efficient, innovating, chasing
- EMOTION Loving, respecting, appreciating, requiring
- PERFORMANCE Let all customers be proud of Nuosen

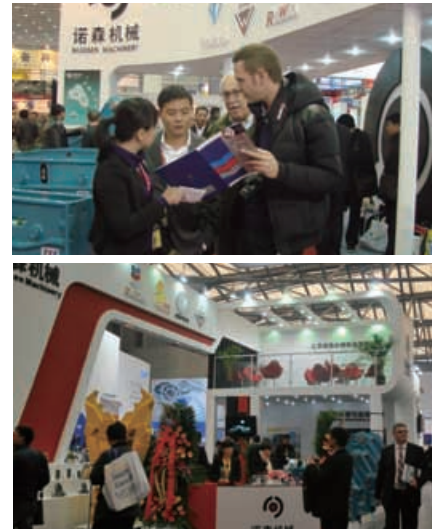

EFFICIENCY  
EXTRAORDINARY  
EXPERT

SINCE 2016, WE HAVE TAKEN PART IN THE MAIN INTERNATIONAL MACHINERY EXHIBITION, OUR BRAND IS ACCEPTED BY OUR HONORABLE CUSTOMERS.
